

Dear Commissioners:

Stop hidden phone fees so I can truly compare prices of phone services. I support the petition filed by the National Association of State Utility Consumer Advocates and endorsed by other consumer advocacy organizations. CG Docket No. 04-208, Petition for Declaratory Ruling Regarding Truth-In-Billing and Billing Format, is long overdue.

Phone bills should be truthful and easy to understand. There use to be one bill on phone services, that didn't attach more excuses to rip consumers off, over some get rich quick schemes. Too much greed has taken over in replacing quality with quantity. Dishonesty with the public is still bad business and can be considered fraudulent, in a court of law. Consumers end up paying phone bills, that others failed to pay, by company sneaking such a tab on their bill; this is wrong too!

Because this practice is tolerated by the FCC, long distance and wireless phone companies are able to hide the true cost of service. These add-ons make the advertised price of service significantly less than the amount of the check I have to write each month to pay the bill. Competition will not work if consumers cannot accurately compare prices when shopping for service.

Many states are stepping up to address this problem. They should be allowed to proceed. However, the FCC shouldn't shirk its responsibility, nor limit states from doing more.

The FCC should immediately grant the NASUCA petition to investigate billing practices, and prohibit phone and wireless companies from imposing separate monthly fees, line items or surcharges unless expressly mandated by law or the charge is expressly authorized by a governmental authority.
